T17 Superfoam® Safety/Anti-fatigue Matting

Available Colors: Black

Superfoam® is an extremely lightweight anti-fatigue mat designed especially for ease of handling and ergonomic comfort. Made from a closed cell PVC Nitrile foam blend Superfoam® does not absorb liquids and is highly resistant to greases, oils, animal & vegetable fats. This allows it to be used in areas where occasional overspray and dripping occur such as dishwashing stations and bar areas. And because Superfoam® is lightweight, it is the perfect mat for use in areas where mats are regularly moved for cleaning like cooking lines, service counters, and food prep stations.
