FREEZER/COOLER CURTAIN THE PEOPLE FRIENDLY CURTAINSM

FLEXCOOL ... A NAME YOU CAN TRUST

- EASY TO REMOVE STRIPS**
 Unique Velcro[®] attached individual strips are easily removed and reattached for easy cleaning or replacement. There is no need to replace the entire curtain and no tools are required.
- TEXTURED STRIP SURFACE**
 Prevents strips from sticking together, which allows the curtain to hang uniformly for maximum effectiveness, thus reducing ice build-up from freezer. Temperature range: -10°F to 180°F.
- CONVENIENT MOUNTING HEADER**
 Header is designed for either wall or ceiling installation on all surfaces.
- 97% STRIP OVERLAP**
 Lightweight 3" wide strips part easily for passage, then close immediately to maintain an energy efficient seal by tight-fitting 97% overlap.
- IMMEDIATE DELIVERY**
 (24) sizes including 84", 96", and 108" curtain lengths; mounting headers from 37" to 55" wide.
For wider requirements, simply use multiple size combinations.
- ENERGY SAVINGS**
 Reduces airflow between cooler/freezer and warmer outside air, which helps to maintain more even temperatures and potentially reduce compressor run time.
- REDUCE EQUIPMENT REPAIRS**
 Ability to decrease cooling equipment running time, and can potentially reduce coil icing too.

SIZES AVAILABLE

A	WIDTHS	37"	43"	49"	55"
B	LENGTHS	84"	96"	108"
